How will Cotton Blossom improve my garden?

■ WHAT IS COTTON BLOSSOM COMPOST?

Semco's Cotton Blossom Compost is a natural fertilizer that increases beneficial organisms within the soil. It is produced during the ginning process of Cotton plants. The leaves, stem and burrs of cotton are a primary storehouse of nutrients which contain a significant amount of Nitrogen, Phosphate and Potassium, the three macronutrients vital for plants. These nutrients actually stimulate and loosen the soil enabling water and oxygen to easily get to your plants so they grow to their fullest potential.

■ **WHEN SHOULD I USE COTTON BLOSSOM COMPOST?** Semco's Cotton Blossom Compost is designed to be used in concentrated applications when planting flowers, perennials, trees and shrubs. The extra nutrients and microbial value in Cotton Blossom Compost give the push new flowers and plants need to grow healthy.

■ HOW DO I USE COTTON BLOSSOM COMPOST?

- **Flowers & Perennials:** Apply 2" - 3" of Cotton Blossom Compost and mix into the soil at root level to get vital nutrients to the plant. One 2 cu.ft. bag will cover about 8 sq.ft.
- **Trees, Shrubs & Evergreens:** Dig holes slightly deeper and wider than the rootball. Mix 1/3 Cotton Blossom Compost with 2/3 soil. Add the mixture into the soil at the bottom of the hole.
